● Indo – Pak Relations: 1947-1964	87
● Argument on Indian Culture and History	93
● The AFSPA: Historical Background and Implementation	107

Himen Das, a Ph. D Scholar of Pondicherry University who hails from Kamakhya Gate, Near Ganesh Mandir, Guwahati— 781009, Assam, India is interested mainly in the history of contacts between country and country, more clearly Western and Eastern history, which is nothing but Global History. Global History, besides other corners, is the history of mankind. Mankind earns spirit from contact. The history of contact leads us to understand the various aspects of global society—culturally, commercially, mythologically, ethnically, economically, and so on. Without contact man becomes a creature of barren land, about which T. S. Elliot, the Nobel Laurate Poet of 1948 wrote symbolically in his world-famous work 'The Waste Land'. Main purpose of history is not to live on waste land but on fertile soil. History is for past, present and future—at least in his understanding. He reads and writes history with this motto only. His research topic for Ph. D is also bordering and echoing on this horizon— Anti- British Resistance in North- East India: 1777-1919.

This is his first book on history, hence he begs an apology from his readers in advance for the mistakes, if any.
